

ART

ART-126-01, *Studio Art Fundamentals*

Making art in the 21st century draws upon a long tradition of methods, materials, and conceptual and philosophical perspectives, and combines those traditions with new and expanding approaches. This course is intended to be a hands-on introductory exploration of both traditional and contemporary materials and ideas that influence contemporary practices of design and fine art. Students will be introduced to methods of creative research, with projects and discussions designed to help illuminate the considerations one must take into account when designing two-dimensional imagery, three-dimensional objects and spaces, and time-based or virtual projects. There will be a strong emphasis on understanding how these three categories relate to one another, and on the practice of "reading" visual information in a more sophisticated manner. Traditional and emerging media - including but not limited to drawing, painting, sculpture, and digital technologies - will be explored.

ART-202-01, *Art in Film*

This course will explore the dynamic relationship between film and art from the late 20th century to the present, examining how visual art and important art historical moments and personas are featured in film. By studying films about art, the course will address the impact of visual arts and the ways that films use particular effects of the moving multi-sensory image to capture characteristics of art history.

ART-204-01/HSP-270-01, *Art & Archaeology of Ancient Americas*

This course will explore the art and architecture of the great civilizations of Mesoamerica and the Andean region of South America from around 1500 BC until the arrival of Europeans in the New World. Similarities and distinctions in such aspects as urban planning, architecture, monumental sculpture, and portable arts will be explored among the great cultures of the Olmec, Teotihuacan, Maya, Aztec, Nazca, Moche, and Inca.

ART-220-01, *Digital Filmmaking*

This filmmaking studio production course is an introduction to high-definition digital filmmaking and ephemeral media as an expressive art form. It will provide a basic understanding of digital film technology, techniques, and terminology. Course assignments may include exploring archival footage mash-ups, chroma key composites, 2-D key-frame animation collages, voiceover, and experimental/narrative live-action projects. No previous editing, sound, or camera experience is required.

ART-225-01, *Drawing Animation*

Do you enjoy sketching or drawing? In this course, you will not only develop your drawing skills but bring your drawings to life with animation. Using Adobe After Effects and Photoshop, students will learn effective ways to animate their drawings and explore their ideas. Through a series of prompts, the class will create short animations that explore various drawing media such as graphite, charcoal, and ink. Experimentation, aesthetic sensibilities, and creating unique, original visual images will be stressed in every animation. Some projects may also incorporate the use of digital scanners to include original textures, materials, and objects. This class does not focus on traditional hand-drawn animation methods of creating multiple drawn frames to produce the illusion of movement (it's much easier and less time-consuming than that. You only have to draw something once to animate it.) No previous drawing or software experience is required.

ART-228-01, *Painting: Mixed Media*

A thorough investigation of the historic and contemporary materials, techniques, and conceptual concerns related to painting. Participation in this course will allow students the opportunity to explore the process of composing images, begin practicing studio research, and experiment with both traditional and contemporary approaches to making art.

ASIAN STUDIES

ASI-112-01/ENG-11-01, *Manga and Anime*

From Akira Toriyama's *Dragon Ball* to Sui Ishida's *Tokyo Ghoul*, manga and anime have earned a reputation for being globally influential mediums of literature and entertainment. Manga storytellers often use their works to interrogate complex themes, issues, and queries of humanity, technology, gender, race, existential beliefs, and culture. Likewise, anime adaptations make use of cinematic visual storytelling to expand on the source material of manga stories with voice acting and music to increase the thematic depth and audience immersion. This course will

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

feature a wide selection of manga and anime and consider what can be learned from understanding their narrative dimensions. Texts will range from Dragon Ball and Sailor Moon to Haikyuu, Fullmetal Alchemist, and Tokyo Ghoul. The material for the course will be read/viewed in translation, so it is not necessary to know Japanese to take this course.

ASI-238-01/PSC-240-01/PPE-240-01, *Trade Politics of Asia Pacific*

Trade politics are a complex nexus of domestic and international politics, economic conditions, global and regional institutions, business interests, and civil society. This course aims to provide an understanding of trade politics in the Asia-Pacific region - the largest market and manufacturing base in the world. The course introduces the latest developments in the Pacific Rim by reviewing cutting-edge research. The first half of the course covers trade policy preferences of Asia-Pacific countries, intraregional and extra-regional free trade agreements, and the political implications of Asia-Pacific's key position in the global supply chain. Specifically, we will analyze trade politics between Australia, China, Mexico, Peru, South Korea, and the United States. The second half of the course focuses on the politics of multinational corporations, foreign direct investment, trade in services, and digital trade. We will then examine the impacts of global trade on Asia-Pacific's labor rights, development, and environment. There are no prerequisites for this class as we will go over the trade models throughout the semester if needed.

BIOLOGY

BIO-111 and BIO-111L, *General Biology I*

Must register for both lecture and lab. First semester of a two-course sequence in the concepts of biology for biology majors. This course is a prerequisite for all advanced courses in biology. BIO 111 covers biomolecules, cell biology, genetics, and evolution. Three lectures and one laboratory period weekly. Offered in the fall semester.

BLACK STUDIES

BLS-201-01, *Introduction to Black Studies*

This is the methods course for the field. Ideally minors will take this course in the fall or spring of their sophomore year. This course will introduce students to the history, methodology, and major problems in Black Studies through an interdisciplinary survey of literature, cultural theories, and historical works. Meets the Diversity Requirement for the PPE major.

BLS-280-01/PSC-214-01/HIS-240-01, *Politics of the Civil Rights Movement*

This course offers an in-depth look at the African American civil rights movement and its significance to the political development of the United States. Topics will include the organizations and campaigns that comprised this historic social movement; the mobilization and experiences of individual civil rights movement participants; the impact of the civil rights movement on public policy; and contemporary social movement efforts to mitigate racial inequality. Particular attention will be paid throughout the course to the role college students played in the civil rights movement.

CHEMISTRY

CHE-106, *Survey of Biochemistry*

Foods, medical treatments, and biotechnological applications are important aspects of daily life, both for the individual and society as a whole. This course will focus on the biochemistry of the fundamental building blocks of life: proteins, carbohydrates, lipids, and nucleic acids. It will include a broad overview of general and organic chemistry in the context of biomolecules. Emphases will include structure-function relationships, energy, human health, and societal issues. This course applies toward the lab science requirement, but does not count towards the chemistry, biochemistry, or biology majors or minors.

CHE-111 and CHE-111L, *General Chemistry I*

Must register for both lecture and lab. This is the introductory course for science concentrators. Topics include atomic theory, stoichiometry, thermo chemistry, equilibrium, gas laws, states of matter, solutions, atomic structure, and acid/base chemistry. The laboratory, which emphasizes the basic principles discussed in lecture, includes significant synthetic and analytical work. Three lectures and one laboratory each week. This course is offered in the fall semester.

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

CHI-101 and CHI-101L, *Elementary Chinese I*

Must register for both lecture and lab. The student with little or no previous training in Chinese will become grounded in the language and gain some understanding of the culture of the Chinese-speaking world. Successful completion of the course means that one will be able to understand and respond in common conversational situations, read straightforward prose, and write simple but correct Chinese. This course is typically offered in the fall semester. Successful completion of both CHI-101 and CHI-102 satisfies the World Languages distribution requirement.

CLASSICS

CLA-101-01, *Classical Mythology*

An introduction to the major gods and heroes of Greek and Roman antiquity. The course surveys their representation in ancient works of literature and art, as well as the major schools of interpretation of myth. Attention also to modern retellings of classical myths and to the power of these myths to create meaning. Counts toward the Gender Studies minor.

CLA-105-01/HIS-200-01, *Ancient Greece*

This is a survey course of Greek political, military, cultural, and literary history from the end of the Bronze Age (ca. 1100 B.C.) to the time of Alexander the Great (4th century B.C.). A thematic focus will be the origins, evolution, and problems of the most important Greek political-social-cultural structure, the polis, or "city-state."

CLA-111-02/REL-290-02, *Afterlife*

2nd Half Semester Course

Conceptions of afterlife frequently govern our 'now'-life, providing it with meaning and an overarching logic. Yet, we rarely pause to consider where our ideas about the afterlife come from, not to mention the historical events, social histories, and philosophies that gave rise to views of the afterlife now held to be obvious and timeless. There was a time 'before' heaven above, resurrection of the body, the immortality of the soul, and even angels. How do conceptions of the afterlife emerge, and what is the range of those conceptions in the Jewish, Roman, and Christian traditions? Moreover, how do these traditions mutually inform one another? This course will detail ancient ideas about the afterlife in a wide array of textual and archeological tradition in conversation with our contemporary world. Will our technology change our afterlife?

CLA-113-01/HIS-210-01, *Vote for Caesar*

1st Half Semester Course

It's election season! You and your Roman friends are running a campaign for the highest office in the land - consul. But what does it take to win an election in the Roman Republic? Endorsements, bribes, getting the gods on your side? In this class, we not only learn the ins and outs of Roman elections but also how politicians worked the system to gain power and influence. We explore how social networking functioned in Ancient Rome, what role religion played, how much violence went on, and, of course, how ancient elections compare to those we hold today. You will be exploring all of this as you and your team of partisans run your own in-class campaign for political office.

CLA-113-02/HIS-210-02, *Hieroglyph to Hypertext*

2nd Half Semester Course

Writing is arguably the greatest human invention. It allows us to communicate thoughts and feelings across time and space, preserve and build treasuries of knowledge, and give expression to highly complex ideas. Without it, humans would have no way of efficiently governing large and complex societies, no recorded history, no sacred texts, etc. In this class, we explore the origin and evolution of this remarkable technology, examining the similarities and differences between various ancient writing systems and their latest descendants, from computer code to emojis. Along the way, we'll play with scripts by creating our own ciphers, exploring the strange world of alphabetic mysticism, and even using Wabash's collection of 4000-year-old cuneiform tablets to make our own clay replicas.

CLA-240-01/PHI-240-01, *Ancient Philosophy*

This course surveys the Ancient Greek philosophy, including Pre-Socratics, Plato, and Aristotle; Hellenistic philosophy may also be included. This course focuses on acquiring and improving abilities in philosophical reading, thinking, and expression. In class, the norm is close textual analysis through lectures and discussion. Topics include

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

the nature of the physical and human world, and questions about knowledge and ultimate being. This course is offered in the fall semester.

COMPUTER SCIENCE

CSC-101-01, Intro to Computer Science

An introduction to the field of computer science: the study of algorithmic processes and the machines that implement them. Students will study the history of computing as well as ethical issues raised by computing and automation. Students will study fundamental areas of the discipline, including basic digital circuits, computer hardware and architecture, data representation, issues of computability, and algorithm design and analysis. Students will also engage in hands-on activities involving basic digital circuits, hardware and programming.

CSC-111-01, Intro to Programming

Requires instructor permission. Contact Prof. William Turner (turnerw@wabash.edu).

This course provides an introduction to programming and problem solving in a higher-level, general-purpose language. Programming topics include primitive data types, simple data types such as arrays, program constructs such as conditionals, loops, and functions, and the fundamentals of object-oriented programming. (Note: CSC-111 does not count as a laboratory science.)

ECONOMICS

ECO-101, Principles of Economics

This introductory course, which covers the basic foundations of microeconomics and macroeconomics, is the gateway to the economics curriculum and an important part of a well-rounded education. The microeconomics portion of the course covers basic supply and demand analysis, market failure, present value, opportunity cost, and the theory of the firm. The macroeconomics portion of the course introduces issues such as inflation, unemployment, and government policy tools. In addition to discussion and problem solving, the class will focus on the use of Microsoft Excel to analyze real-world economic data.

EDUCATION STUDIES

EDU-101-01, Intro to Child & Adolescent Development

The course examines child and adolescent development through the lens of education. Using a variety of course texts, students are introduced to theories of development and to the concept of diversity as it relates to child and adolescent development. Focusing on elements of development, including biological/physical, cognitive, social, identity, and language with some attention to moral - students engage in school and community-based field placements as they are introduced to qualitative data collection/analysis techniques. EDU-101 students compose a variety of reflective essays and analytical reports based on field work and course texts. Field Component: EDU-101 students are required to complete a total of 15 hours of field work spread across the semester in three school settings (elementary, middle, and high school) and/or community-based organizations (e.g., Boys & Girls Club). While the nature of the field work is largely observational and students do not have explicit teaching responsibilities, they are expected to be engaged in the life of the host classes or community organization, and to interact with hosts in ways that are helpful and foster understanding of child and adolescent development. Background checks are required by local schools and community-based settings.

EDU-203-01, Adolescent Literacy Development

This course examines adolescent literacy development, defined as an ongoing process distinct from early literacy development and characterized by intellectual and social practices both in and out of school. Students will explore the various dimensions of adolescent literacy, including digital and interdisciplinary literacies as well as the social, cultural, and political domains that inform adolescents' identity development. Students will learn about how the literacy experiences for adolescents have dramatically expanded in recent years. To reflect this expansion, course texts will include classic and contemporary young adult literature, digital texts including blogs and gaming, as well as popular music and social media. Part of the course will be devoted to investigating the ways in which middle and high school pedagogical practices have kept pace with the changing landscape of adolescent literacy. Other topics guiding our discussions will include: the impact multiple literacies have on adolescent development and how those literacies are valued and devalued in schools. EDU-203 counts as curriculum and pedagogy credit for the minor in Education Studies and is open to all students as an elective.

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

ENGLISH

ENG-105-01, *Introduction to Poetry*

1st half semester class. This class will introduce you to the study of poetry through intensive reading and intensive written analysis. We will focus on close reading of a wide range of poems from a variety of historical periods, genres, and cultures. Through a study of image, symbol, diction, syntax, meter, rhythm, and sound, we will analyze the ways in which a poem creates meaning. Written analyses will emphasize the marriage of formal and thematic elements in particular poems.

ENG-106-01, *Introduction to Short Fiction*

2nd half semester course. This class has two goals: to introduce the study of short fiction through intensive reading, and to familiarize students with strategies and methodologies for writing about literature. In our readings, we will explore formal issues such as tone, structure, and symbolism as well as social issues such as sexuality, race, and gender. This class focuses on ways of grappling with these big questions in writing, as literary scholars do.

ENG-109-01/GEN-171-01/GHL-177-01, *World Literature*

This course focuses on world literature translated into English. Topics vary by semester, but themes in the course include national identity, exile, colonialism, gender inequality, political and religious conflict, and globalization. Refer to the Course Descriptions document on the Registrar's webpage for topics and descriptions of current offerings.

ENG-110-01, *Intro to Creative Writing*

This is an introductory course in Creative Writing. ENG 110 will offer students an opportunity to read and write in several genres: fiction, poetry, and creative nonfiction. The course will focus on writing through the practice of various methods of generation used by established writers, designed to introduce students to issues of language, form, image, character, and structure. Students will also learn critical tools for assessing good writing and be introduced to the workshop model for discussing creative work. Students will acquire these tools through peer review, through close reading of contemporary texts, and through revision. The course is especially suited to students who would like to learn a variety of creative genres before committing themselves to genre-specific creative writing courses.

ENG-171-01/ASI-112-01, *Manga and Anime*

From Akira Toriyama's *Dragon Ball* to Sui Ishida's *Tokyo Ghoul*, manga and anime have earned a reputation for being globally influential mediums of literature and entertainment. Manga storytellers often use their works to interrogate complex themes, issues, and queries of humanity, technology, gender, race, existential beliefs, and culture. Likewise, anime adaptations make use of cinematic visual storytelling to expand on the source material of manga stories with voice acting and music to increase the thematic depth and audience immersion. This course will feature a wide selection of manga and anime and consider what can be learned from understanding their narrative dimensions. Texts will range from *Dragon Ball* and *Sailor Moon* to *Haikyuu*, *Fullmetal Alchemist*, and *Tokyo Ghoul*. The material for the course will be read/viewed in translation, so it is not necessary to know Japanese to take this course.

ENG-202-01, *Writing with Power and Grace*

This class addresses one of the most important questions of higher education, and, indeed, of life: how to express yourself clearly and gracefully. The premise of this class is that writing well is a potent form of power and beauty. To achieve that goal, we'll study the major principles of grammar, style, and clarity. Although all are welcome, this class will be of particular interest to freshmen and sophomores who either did not take the Composition or would like further practice in writing. This course does not count toward the creative writing track of the English major. This course is offered in the fall and spring semesters.

ENG-212-01, *Poetry Workshop*

The intermediate course in poetry writing will build upon the principles in English 110. The course will have a strong workshoping component, starting early in the second week of instruction. The course will focus heavily on generating poetry and learning to read as writers. Usually a combination of an anthology and a book on the craft of

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

writing poetry will comprise the required texts. Besides generating assignments, producing original workshopped poems, and reading a variety of texts, students will also be responsible for peer evaluation and critique. This will help hone their own aesthetic sense and provide the critical foundation necessary for the third tier of workshops.

ENG-240-01, *American Literature after 1800*

This survey introduces the writers and trends of our century, from realism and naturalism through modernism to the rich, fragmented energy of postmodernism and multiculturalism. Writers covered vary from year to year but may include Henry James, James Weldon Johnson, Edith Wharton, Robert Frost, Edna St. Vincent Millay, William Carlos Williams, E. E. Cummings, Ernest Hemingway, Margery Latimer, William Faulkner, Langston Hughes, Willa Cather, F. Scott Fitzgerald, J. D. Salinger, Allen Ginsberg, Gary Snyder, Amiri Baraka, John Barth, Raymond Carver, Galway Kinnell, Sharon Olds, Louise Erdrich, Sandra Cisneros, Toni Morrison, and Don DeLillo. This course is offered in the spring semester.

ENG-297-01, *We Get Lit: Reading Like a Pro*

Scientists have beakers and microscopes; social scientists have surveys and interviews, but what are the research tools for studying literature? How can you become a better, more confident reader of poems, plays, or short stories? In this course, you will learn how to “get” literature. Your professor will introduce you to the tools you can use to understand a writer’s craft, identify a range of allusions and metaphors, and ask better questions of texts. You will read a variety of genres of literature (novels, plays, poems) while developing a vocabulary that is essential to literary analysis. You will also learn some of the major “schools of thought” in literary studies, that is, the theories scholars have used better understand why writers write, why readers read, and why teachers across the globe assign certain texts to students. All English majors taking the literature track are required to take this course, preferably during their freshman or sophomore years. Students taking the creative writing track are encouraged but not required to take this course.

ENG-298-01, *Business & Technical Writing*

Business and technical writing get work done. People who can communicate effectively have an advantage in the workplace. In this class, students will develop writing skills for a range of professional circumstances. Students will craft documents to address specific audiences and purposes, especially in increasingly diverse workplaces; design templates and visually appealing documents; create professional digital portfolios; and identify skills and qualities that make each individual an asset to professional organizations.

ENG-310-01/THE-217-01, *The American Stage*

This course will examine the rich dramatic heritage of the United States from the American Revolution to the present, with emphasis on the history of the U.S. stage and the work of major dramatists including Eugene O’Neill, Thornton Wilder, Tennessee Williams, Arthur Miller, and Edward Albee, among others. Plays to be studied include *The Contrast*, *Secret Service*, *Uncle Tom’s Cabin*, *Long Day’s Journey Into Night*, *A Moon for the Misbegotten*, *Awake and Sing!*, *The Little Foxes*, *Our Town*, *The Skin of Our Teeth*, *Mister Roberts*, *A Streetcar Named Desire*, *The Night of the Iquana*, *Death of a Salesman*, *The Crucible*, *A Raisin in the Sun*, *The Zoo Story*, *Who’s Afraid of Virginia Woolf?*, *Glengarry Glen Ross*, *True West*, *Brighton Beach Memoirs*, *The Colored Museum*, *A Perfect Ganesh*, *Fences*, *Angels in America*, *How I Learned to Drive*, and *The America Play*. The plays will be discussed as instruments for theatrical production; as examples of dramatic style, structure, and genre; and, most importantly, as they reflect moral, social, and political issues throughout the history of the United States. Students taking this course for credit toward the English major or minor must have taken at least one previous course in English or American literature. No more than one course taken outside the English Department will be counted toward the major or minor in English.

FRENCH

FRE-101 and FRE-101L, *Elementary French I*

Must register for both lecture and lab. Requires FRE-101 placement OR placement at any level in a different language.

The student with little or no previous training in French will become grounded in the language and gain some understanding of the culture. Successful completion of the course means that one will be able to understand and respond to common conversational situations, read straightforward prose, and write simple but correct French. This

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

course is offered in the fall semester. Successful completion of both FRE-101 and FRE-102 satisfies the World Languages distribution requirement.

FRE-201 and FRE-201L, *Intermediate French*

Must register for both lecture and lab. Requires FRE-201 placement.

A thorough review of the fundamentals of the language. Concentration will be on continued growth in the active use of the language: speaking, listening, reading, and writing. Students will read French texts that will reinforce the study of the language and the observation of the culture. Particular attention will be given to improving self-expression in French beyond the rudimentary level. This course is offered in the fall semester.

GENDER STUDIES

GEN-101-01, *Introduction to Gender Studies*

This course introduces students to the interdisciplinary field of gender studies by exploring questions about the meaning of gender in society. The course will familiarize students with the central issues, questions, and debates in Gender Studies scholarship by analyzing themes of gendered performance and power in law, culture, education, work, health, social policy, and the family. Key themes may include but are not limited to the relationship between sex and gender, the legal and social workings of the private / public distinction, the way that disciplinary practices code certain behaviors as masculine or feminine, the intersection of gender with race and ethnicity, the gendered structure of power, the tension between difference and equality, the production and circulation of gender expectations in the media, and the contested role of the law in achieving equality. By course end, students will understand central themes and debates in the field of gender studies, demonstrate a facility with basic terms and concepts of the field, apply methods of analyzing gender to society and to their own life experiences and communicate effectively about these issues in writing and speech.

GEN-171-01/ENG-109-01/GHL-177-01, *World Literature*

This course focuses on world literature translated into English. Topics vary by semester, but themes in the course include national identity, exile, colonialism, gender inequality, political and religious conflict, and globalization. Refer to the Course Descriptions document on the Registrar's webpage for topics and descriptions of current offerings.

GERMAN

GER-101 and GER-101L, *Elementary German I*

Must register for both lecture and lab. Requires GER-101 placement OR placement at any level in a different language.

The student with little or no previous training in German will become grounded in the language and gain some understanding of the culture of the German-speaking world. Successful completion of the course means that one will be able to understand and respond in common conversational situations, read straightforward prose, and write simple but correct German. This course is offered in the fall semester. Successful completion of both GER-101 and GER-102 satisfies the World Languages distribution requirement.

GER-201 and GER-201L, *Intermediate German*

Must register for both lecture and lab. Requires GER-201 placement OR placement at any level in a different language.

A thorough review of the fundamentals of the language. Concentration will be on continued growth in the active use of the language: speaking, listening, reading, and writing. Students will read German texts which will reinforce the study of the language and the observation of the culture. Particular attention will be given to improving self-expression in German beyond the rudimentary level. This course is offered in the fall semester.

GLOBAL HEALTH

GHL-177-01/ENG-109-01/GEN-171-01, *World Literature*

This course focuses on world literature translated into English. Topics vary by semester, but themes in the course include national identity, exile, colonialism, gender inequality, political and religious conflict, and globalization. Refer to the Course Descriptions document on the Registrar's webpage for topics and descriptions of current offerings.

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

GHL-219-01/HIS-200-02, *Drugs & Society in Modern History*

What is a drug? This course examines the history of drugs in society by first asking what a drug or intoxicant might be. The class will then consider how different societies have accepted or rejected drugs based on their usefulness or danger to the social order. We will examine changing cultural attitudes toward drugs, the rise of modern drug regulation, and the development of the pharmaceutical drug. For example, why did drinking coffee and tea become an accepted activity, but smoking opium was increasingly frowned upon during the nineteenth century? Why did Viagra become medically acceptable, but mercury fell out of favor to treat disease in the 20th century? Key topics will include the growth and regulation of the opium trade in the 19th century, the cultural, economic, and social factors shaping alcohol policies in the late 19th and early 20th centuries, the medicalization of drug use and the development of the pharmaceutical industry, the impact of drug regulation, the emergence of the global war on drugs in the 20th century, the historical interpretations of cannabis, alcohol (tequila, absinthe), meth, Viagra, chocolate, etc. This course is suitable for all students interested in history, drugs, sociology, and public health! By the end of the course, students will have developed critical thinking and analytical skills to better understand the historical relationships between drugs and society. There is no immersion trip associated with this course, but to be blunt, students will have a daily dose of reading and discussion in addition to short assignments and two exams.

GREEK

GRK-101 and GRK-101L, *Beginning Greek I*

Must register for both lecture and lab. Requires GRK-101 placement OR placement at any level in a different language.

This course includes the study of elementary grammar, the reading of selected pieces of Greek literature, and a general introduction to the literature and civilization of ancient Greece. Four class meetings each week. This course is offered in the fall semester. Successful completion of both GRK-101 and GRK-102 satisfies the World Languages distribution requirement.

HISTORY

HIS-101, *World History to 1500*

Exploration of the origins of human societies and the development of their hierarchical structures and the network connections between them across the world. An effort will be made to develop a conceptual framework for analyzing different societies and network interactions comparatively so as to highlight meaningful similarities and differences among them. This course, along with HIS 102, is especially recommended to those students taking their first college-level history course.

HIS-200-01/CLA-105-01, *Ancient Greece*

This is a survey course of Greek political, military, cultural, and literary history from the end of the Bronze Age (ca. 1100 B.C.) to the time of Alexander the Great (4th century B.C.). A thematic focus will be the origins, evolution, and problems of the most important Greek political-social-cultural structure, the polis, or "city-state."

HIS-200-02/GHL-219-01, *Drugs & Society in Modern History*

What is a drug? This course examines the history of drugs in society by first asking what a drug or intoxicant might be. The class will then consider how different societies have accepted or rejected drugs based on their usefulness or danger to the social order. We will examine changing cultural attitudes toward drugs, the rise of modern drug regulation, and the development of the pharmaceutical drug. For example, why did drinking coffee and tea become an accepted activity, but smoking opium was increasingly frowned upon during the nineteenth century? Why did Viagra become medically acceptable, but mercury fell out of favor to treat disease in the 20th century? Key topics will include the growth and regulation of the opium trade in the 19th century, the cultural, economic, and social factors shaping alcohol policies in the late 19th and early 20th centuries, the medicalization of drug use and the development of the pharmaceutical industry, the impact of drug regulation, the emergence of the global war on drugs in the 20th century, the historical interpretations of cannabis, alcohol (tequila, absinthe), meth, Viagra, chocolate, etc. This course is suitable for all students interested in history, drugs, sociology, and public health! By the end of the course, students will have developed critical thinking and analytical skills to better understand the historical relationships between drugs and society. There is no immersion trip associated with this course, but to be blunt, students will have a daily dose of reading and discussion in addition to short assignments and two exams.

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

HIS-200-03/MUS-205-01, *European Music before 1750*

The rise of European art music from religious and folk traditions; Gregorian chant and early polyphonic genres; the growth of polyphony in mass, motet, and madrigal; early instrumental music; European genres of the 17th and 18th centuries: opera, oratorio, cantata, concerto, suite, sonata, keyboard music. Some emphasis on the music of J.S. Bach.

HIS-210-01/CLA-111-01, *Vote for Caesar*

1st Half Semester Course

It's election season! You and your Roman friends are running a campaign for the highest office in the land - consul. But what does it take to win an election in the Roman Republic? Endorsements, bribes, getting the gods on your side? In this class, we not only learn the ins and outs of Roman elections but also how politicians worked the system to gain power and influence. We explore how social networking functioned in Ancient Rome, what role religion played, how much violence went on, and, of course, how ancient elections compare to those we hold today. You will be exploring all of this as you and your team of partisans run your own in-class campaign for political office.

HIS-210-02/CLA-111-02, *Hieroglyph to Hypertext*

2nd Half Semester Course

Writing is arguably the greatest human invention. It allows us to communicate thoughts and feelings across time and space, preserve and build treasuries of knowledge, and give expression to highly complex ideas. Without it, humans would have no way of efficiently governing large and complex societies, no recorded history, no sacred texts, etc. In this class, we explore the origin and evolution of this remarkable technology, examining the similarities and differences between various ancient writing systems and their latest descendants, from computer code to emojis. Along the way, we'll play with scripts by creating our own ciphers, exploring the strange world of alphabetic mysticism, and even using Wabash's collection of 4000-year-old cuneiform tablets to make our own clay replicas.

HIS-230-02, *History of Masculinity*

This course examines evolving constructions of masculinity in Europe from the mid-16th century to the present day, covering historical transformations, ideologies, and representations of masculinity within the European. Class begins by examining the traditional ideals of masculinity prevalent in the 16th century and expectations placed on men to craft families and fortunes. We then move to an exploration of how social, political, and economic changes during the Enlightenment and Industrial Revolution impacted masculine identities and the expectations placed on men. Students will investigate how masculinity was shaped by medicine, nationalism, imperialism, and revolution, as well as by shifts in labor patterns and family structures. Moving deeper into the 19th century, we will face down challenges brought by feminist movements, as well as the impact of scientific developments on understandings of sex and gender. Themes such as the "cult of domesticity," militarism, and colonial masculinity will be explored. In medicine we will discuss the importance of men's health to a national audience. Readings for the tumultuous 20th century examine the impact of two World Wars, totalitarian regimes, and rapid social changes on masculine identities. Topics include the rise of fascism (Nazism) and its glorification of hyper-masculinity, the effects of mass media on shaping masculine ideals, and the challenges to traditional masculinity posed by post-war reconstructions. In the contemporary era, the course analyzes the ongoing transformations of masculinity in response to the introduction of condoms and "the pill", globalization, neoliberalism, and changing gender norms. Finally, students will explore new representations of masculinity, including those in LGBTQ+ communities, in hegemonic masculinity, and the influence of consumer culture and digital technologies on men. Students will explore a combination of primary sources and scholarly readings. Classes will consist of discussion and lecture. Throughout, we will explore how masculinity has been constructed, contested, and renegotiated to shape societies and the power dynamics in the modern human experience.

HIS-240-01/BLS-280-01/PSC-214-01, *Politics of the Civil Rights Movement*

This course offers an in-depth look at the African American civil rights movement and its significance to the political development of the United States. Topics will include the organizations and campaigns that comprised this historic social movement; the mobilization and experiences of individual civil rights movement participants; the impact of the civil rights movement on public policy; and contemporary social movement efforts to mitigate racial inequality. Particular attention will be paid throughout the course to the role college students played in the civil rights movement.

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

HIS-240-02/HSP-250-02, *Digitizing Immigration History*

How has the Internet changed what we know about the past? In this hands-on course, we'll answer that question by focusing on the history of immigration in the US. We'll roll up our sleeves and collaboratively play (and sometimes fail) with digital technology, interrogating search engines and AI chatbots, exploring digital archives, and looking under the hoods of mapping, textual analysis, and network visualization projects. Throughout, we'll think about the methodological implications of doing immigration history online, including the ethical challenges of sharing immigrants' stories and reducing human lives to data. We'll conclude the semester with a Web-based, student-designed, group research project related to the history of immigration. No experience in computer science, digital media, immigration studies, or history required, although an interest in at least one of these is recommended!

HISPANIC STUDIES

HSP-250-01/SPA-312-01, *The Dominican Republic*

2nd Half Semester Course. The history of baseball in the Caribbean is rich and deeply intertwined with the region's culture, social dynamics, and historical events. "The Dominican Republic" is a half semester course (2nd half) and will give students the chance to study the literature, culture, and history of the Caribbean through the lens of Baseball. The language of instruction will be English.

HSP-250-02/HIS-240-02, *Digitizing Immigration History*

How has the Internet changed what we know about the past? In this hands-on course, we'll answer that question by focusing on the history of immigration in the US. We'll roll up our sleeves and collaboratively play (and sometimes fail) with digital technology, interrogating search engines and AI chatbots, exploring digital archives, and looking under the hoods of mapping, textual analysis, and network visualization projects. Throughout, we'll think about the methodological implications of doing immigration history online, including the ethical challenges of sharing immigrants' stories and reducing human lives to data. We'll conclude the semester with a Web-based, student-designed, group research project related to the history of immigration. No experience in computer science, digital media, immigration studies, or history required, although an interest in at least one of these is recommended!

HSP-270-01/ART-204-01, *Art & Archaeology of Ancient Americas*

This course will explore the art and architecture of the great civilizations of Mesoamerica and the Andean region of South America from around 1500 BC until the arrival of Europeans in the New World. Similarities and distinctions in such aspects as urban planning, architecture, monumental sculpture, and portable arts will be explored among the great cultures of the Olmec, Teotihuacan, Maya, Aztec, Nazca, Moche, and Inca.

LATIN

LAT-101 and LAT-101L, *Beginning Latin I*

Must register for both lecture and lab. Requires LAT-101 placement OR Placement at any level in a different language.

This is a course for students who have had little or no preparation in Latin. The course is primarily concerned with the fundamentals of the language. Its aim is to prepare students to read Latin literature, to improve their command of the English language by studying the close relations (historic and linguistic) between English, Latin and the Romance Languages, and to gain exposure to Roman culture. Four class meetings each week. Students with more than two years of high school Latin who wish to continue the language must take a placement exam. Such students cannot take LAT-101 for credit, but LAT-102 may be taken for credit if they do not place into LAT-201. This course is offered in the fall semester. Successful completion of both LAT-101 and LAT-102 satisfies the World Languages distribution requirement.

MATHEMATICS

MAT-100, *Math Modeling & Precalculus*

Requires MAT-100 placement and instructor permission. Any Student wishing to take MAT-100 for the Fall 2024 semester must complete the form at this link: <https://forms.office.com/r/0FU4YU6rUb>

This course develops problem solving skills fundamental to further study in higher mathematics through mathematical modeling and applications. Students will study algebraic and graphical properties of polynomial, rational, exponential, logarithmic, and trigonometric functions, with a focus on using these to build and understand

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

mathematical models. With a dual emphasis on sharpening core skills and understanding applications, this course provides a review of material relevant for continuing to a full course in calculus. This course is limited to students who intend to continue to MAT-111 as a requirement for his major, but whose placement indicates that a precalculus course is advisable. While it satisfies the Quantitative Literacy (QL) distribution requirement, enrollment in MAT 100 is only available through instructor permission. For students who need distribution credit in QL but do not require a subsequent course in calculus, MAT-103, MAT-104, MAT-106, and MAT-108 are recommended. MAT-100 does not count toward a major or minor in mathematics.

MAT-111, Calculus I

Requires MAT-111 placement.

This course studies the fundamentals of single-variable calculus, developing analytical and computational skills appropriate for students in quantitatively rigorous disciplines. Topics include limits, continuity, techniques of differentiation, applications of derivatives, the Mean Value Theorem, the Intermediate Value Theorem, the Fundamental Theorem of Calculus, and the method of substitution for integration.

MAT-112, Calculus II

Requires MAT-112 placement.

This course continues the study of calculus from [MAT-111](#), developing analytical and computational skills appropriate for students in quantitatively rigorous disciplines. Topics include techniques and applications of integration, numerical integration, improper integrals, infinite sequences and series, Taylor series, and an introduction to multivariable calculus including partial derivatives and multiple integrals.

MAT-223, Linear Algebra

Requires MAT-223 placement.

An introduction to linear equations and vector spaces. Topics include solving linear equations, matrix algebra, row operations, determinants, vector spaces, bases and dimension, linear transformations, eigenvalues and eigenvectors, and orthogonality. Optional topics include least squares problems, matrix factorization, and other applications. An important aspect of the course is to introduce the student to abstract thinking and proofs.

MILITARY SCIENCE & LEADERSHIP

MSL courses are exclusively for ROTC students at the campus of Purdue University and follow Purdue's term dates. Purdue's Fall semester dates are August 19 - December 7, 2024. If you are interested in joining ROTC, contact Dean Jon Jump via email (jumpj@wabash.edu).

MSL-001-01, Leadership Lab

This is a course for ROTC students at the campus of Purdue University and follows Purdue's term dates. Purdue's Fall semester dates are August 19 - December 7, 2024. Purdue's Fall break is October 7-8, and their Thanksgiving Break is November 27-30.

MSL-101-01, Introduction to the Army

This is a course for ROTC students at the campus of Purdue University and follows Purdue's term dates. Purdue's Fall semester dates are August 19 - December 7, 2024. Purdue's Fall break is October 7-8, and their Thanksgiving Break is November 27-30.

MUSIC

MUS-052-01, Chamber Orchestra

Participation in a given performance ensemble may be either on a non-credit or a for-credit basis. Students are expected to participate in ensembles for a full year. There are no grades assigned for non-credit participation, so it does not compute in the student's GPA; non-credit participation is noted on transcripts. For-credit participation is graded, and therefore does compute in the student's GPA. Students are allowed a maximum of four years (2 credits) of for-credit participation, total, regardless of which ensemble(s) are involved. A total of two years (1 credit) may be applied to the fulfillment of distribution requirements. Ensemble participation is required for majors and minors as detailed above. There is no maximum for non-credit participation; students may participate freely as their own schedules allow. Students do not register for participation in any ensemble at the time of course registration, but

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

initiate participation with the ensemble director or the Fine Arts Center Academic Coordinator at the beginning of the academic year.

MUS-053-01, *Glee Club*

Participation in a given performance ensemble may be either on a non-credit or a for-credit basis. Students are expected to participate in ensembles for a full year. There are no grades assigned for non-credit participation, so it does not compute in the student's GPA; non-credit participation is noted on transcripts. For-credit participation is graded, and therefore does compute in the student's GPA. Students are allowed a maximum of four years (2 credits) of for-credit participation, total, regardless of which ensemble(s) are involved. A total of two years (1 credit) may be applied to the fulfillment of distribution requirements. Ensemble participation is required for majors and minors as detailed above. There is no maximum for non-credit participation; students may participate freely as their own schedules allow. Students do not register for participation in any ensemble at the time of course registration, but initiate participation with the ensemble director or the Fine Arts Center Academic Coordinator at the beginning of the academic year.

MUS-055-01, *Jazz Ensemble*

Participation in a given performance ensemble may be either on a non-credit or a for-credit basis. Students are expected to participate in ensembles for a full year. There are no grades assigned for non-credit participation, so it does not compute in the student's GPA; non-credit participation is noted on transcripts. For-credit participation is graded, and therefore does compute in the student's GPA. Students are allowed a maximum of four years (2 credits) of for-credit participation, total, regardless of which ensemble(s) are involved. A total of two years (1 credit) may be applied to the fulfillment of distribution requirements. Ensemble participation is required for majors and minors as detailed above. There is no maximum for non-credit participation; students may participate freely as their own schedules allow. Students do not register for participation in any ensemble at the time of course registration, but initiate participation with the ensemble director or the Fine Arts Center Academic Coordinator at the beginning of the academic year.

MUS-205-01/HIS-200-03, *European Music before 1750*

The rise of European art music from religious and folk traditions; Gregorian chant and early polyphonic genres; the growth of polyphony in mass, motet, and madrigal; early instrumental music; European genres of the 17th and 18th centuries: opera, oratorio, cantata, concerto, suite, sonata, keyboard music. Some emphasis on the music of J.S. Bach.

MUS-224-01, *Approaches to Music & Culture*

This course is designed to develop awareness and analytical appreciation of global musical diversity found within a variety of world cultures. It covers the origin of Ethnomusicology as a sub-discipline, the classification of instruments, the musical and contextual roles instruments play in various cultures, tonal systems in use, and polyphonic and polyrhythmic textures as commonly applied. Course objectives are met through analysis and discussion of texts, audio recordings, and ethnographic fieldwork videos.

PHILOSOPHY

PHI-109-01, *Introduction to Philosophy*

A course in some selected philosophical topic or range of topics designed to provide an example of philosophical reflection and inquiry. Not open to junior or senior majors without permission of the instructor.

PHI-124-01, *Philosophy & Film*

This course uses film to investigate a variety of philosophical issues-issues in such areas as ethics, the theory of knowledge, or existentialism, specific issues such as free will, human responsibility, or human subjectivity, or issues concerning such topics as dystopian futures. The course may also explore philosophical questions about film. Students will typically be expected to watch one film that will be the focus of the class discussion each week and additional films on their own that are related to the theme of the week. The final project may be a paper or perhaps a student-produced film that uses film to investigate a philosophical issue.

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

PHI-240-01/CLA-240-01, *Ancient Philosophy*

A survey of Ancient Greek philosophy, including Pre-Socratics, Plato, and Aristotle; Hellenistic philosophy may also be included. This course focuses on acquiring and improving abilities in philosophical reading, thinking, and expression. Students will be asked to consider the questions and problems raised by ancient thinkers on the basis of close textual analysis and to see how these questions and problems remain relevant through lectures and discussion. Topics include nature, human knowledge, the good, and ultimate being. This course is offered in the fall semester.

PHI-269-01, *Knowledge and Skepticism*

Here are some things that I take myself to know. The world around me is real, and not merely a simulation. The universe is billions of years old and did not come into existence five minutes ago. Antarctica is a continent, but the Arctic is not. There are 211 Republicans in the U.S. House of Representatives. The sun will rise tomorrow. But how do I know those things? What reliable information can I really have about the world around me? These questions are made particularly pressing by the existence of philosophical skepticism, according to which it is impossible for us to know what the world around us is actually like. Despite skepticism's absurd appearance, it is of enduring interest because of the power of the arguments in favor of it. Thus, to study skepticism, we will direct most of our attention to the careful study of arguments. The arguments we study will come from classic and contemporary philosophical works, and we will study them by using software called MindMup to map their structure. This will put us in a position to understand and evaluate these skeptical arguments, with an eye toward determining how we can have knowledge of the world around us.

PHYSICS

PHY-101 and 101L, *Astronomy*

Must register for both lecture and lab. An introductory course intended for the non-science liberal arts student. Historical and philosophical ideas will be stressed as well as the experimental concepts and methods used in astronomy. A good working knowledge of algebra, plane geometry, and trigonometry is required. Satisfies half of the laboratory science requirement. Three class periods and one laboratory each week.

PHY-111 and 111L, *Physics I – Calculus*

Must register for both lecture and lab. A calculus-based introduction to classical mechanics for physics, chemistry, and engineering. Topics include Newton's laws of motion, conservation laws, and rotational dynamics. The lab will introduce data acquisition and analysis techniques. Three class periods and one laboratory each week.

POLITICAL SCIENCE

PSC-111-01, *Intro to American Government & Politics*

An analysis of the powers, functions, and political bases of government in America, including attention to democratic theory, civil liberties, political parties and pressure groups, campaigns and elections, Congress and the Presidency, judicial review, federal-state-local relations, and public policymaking in domestic, foreign, and budgetary areas.

PSC-121-01, *Intro to Comparative Politics*

This class will provide a general introduction to the study of political systems worldwide. The approach and many of the readings will be theoretical, but we will draw from real-world examples as illustrations of these theoretical concepts. Thus, a basic understanding of world history, current events, and even the American political system will be assumed. (A reasonable familiarity with elementary algebra will also be quite helpful.) This course is a requirement for all students who intend to major in political science and is a prerequisite for a number of other courses in the subfield of comparative politics. It is also a good choice for students wishing to satisfy a behavioral science distribution requirement.

PSC-131-01, *Intro to Political Theory*

The survey of political theory will use selected political theorists to examine a series of major issues, concepts, and questions which are central to political theory, e.g., power, authority, justice, and liberty.

PSC-141-01, *Intro to International Relations*

A study of major contemporary approaches to understanding international politics, including political realism, liberalism, and constructivism. Through this framework, the course will take up concepts such as the evaluation of

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

national power and the balance of power, the interplay of individuals and groups in international politics, the impact of capitalism on the development of the world-system, and the role of gender in world politics.

PSC-214-01/BLS-280-01/HIS-240-01, *Politics of the Civil Rights Movement*

This course offers an in-depth look at the African American civil rights movement and its significance to the political development of the United States. Topics will include the organizations and campaigns that comprised this historic social movement; the mobilization and experiences of individual civil rights movement participants; the impact of the civil rights movement on public policy; and contemporary social movement efforts to mitigate racial inequality. Particular attention will be paid throughout the course to the role college students played in the civil rights movement.

PSC-220-01/PPE-238-02, *Political Violence*

Most conflicts today take place within states - either between governments and civilians or among different groups in the country. This course combines theories from international relations and comparative politics to examine a broad range of topics related to political violence. We will discuss various forms of domestic conflicts, including antigovernment protests, riots, state repression, civil war, terrorism, coups, electoral violence, and conflict-related sexual violence. We will also investigate the aftermath of conflicts and international interventions in these conflicts. This class is not a history class or a class on current events; instead, the focus will be on understanding the interests of important actors in political conflicts and the arenas in which these actors interact. At the conclusion of this course, students will be able to: (1) evaluate scientific explanations and key concepts of political violence and nonviolence; (2) explain the causes and consequences of various forms of internal conflicts; (3) understand how the international community deals with the conflicts; (4) apply theoretical approaches to analyze current events and make predictions about future developments; and (5) express ideas in a professional way on several topics and write an original paper.

PSC-240-01/ASI-277-01/PPE-238-01, *Trade Politics of Asia Pacific*

Trade politics are a complex nexus of domestic and international politics, economic conditions, global and regional institutions, business interests, and civil society. This course aims to provide an understanding of trade politics in the Asia-Pacific region - the largest market and manufacturing base in the world. The course introduces the latest developments in the Pacific Rim by reviewing cutting-edge research. The first half of the course covers trade policy preferences of Asia-Pacific countries, intraregional and extra-regional free trade agreements, and the political implications of Asia-Pacific's key position in the global supply chain. Specifically, we will analyze trade politics between Australia, China, Mexico, Peru, South Korea, and the United States. The second half of the course focuses on the politics of multinational corporations, foreign direct investment, trade in services, and digital trade. We will then examine the impacts of global trade on Asia-Pacific's labor rights, development, and environment. There are no prerequisites for this class as we will go over the trade models throughout the semester if needed.

PSYCHOLOGY

PSY-101, *Introduction to Psychology*

A survey of concepts, principles, and theories of an empirical science of behavior. Topics include behavioral biology, learning, memory, sensation, perception, cognition, motivation, emotion, social behavior, personality, and psychopathology.

PSY-110-01, *Mindfulness & Health*

2nd Half Semester Course. Mindfulness has become increasingly popular in programs to help support health and wellness. Studies of mindfulness programs have focused on a range of potential benefits, from stress reduction and managing blood pressure, to helping with substance abuse and sleep quality. In this course, we focus on the psychology of stress and focus on developing mindfulness through practices drawn from Mindfulness-based Stress Reduction (MBSR), adapted for the college classroom. We will also consider how mindfulness today (which is often presented as set of secular tools) has roots in several contemplative traditions. Class activities will focus heavily on active participation in components MBSR and application of mindfulness to our daily life.

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

RELIGION

REL-103-01, *Islam & Religions of India*

This course is an introduction to Islam, and the Indigenous religions of India. The first part of the course studies the history, beliefs, and practices of Islam in the Middle East from Muhammad to the present day. The second part studies the history, beliefs, and practices of the religions of India (Hinduism, Buddhism, and Jainism), down to the coming of Islam in the 8th century. The third part deals with the religious developments in India that have resulted from the interactions between Islam and Hinduism in the modern period. Emphasis is placed upon readings in primary texts of these religions. This course is offered in the fall semester.

REL-141-01, *Hebrew Bible/Old Testament*

This is an introduction to the Tanakh, or Hebrew Bible. The format of this course will be reading and discussion of primary texts from the Torah, Prophets, and Writings of the Hebrew Bible. The emphasis will be reading for literary and narrative themes and theological issues in the text, with some discussion of historical context. This course is offered in the fall semester.

REL-171-01, *History of Christianity to Reformation*

An introduction to the history of Christianity from the patristic, post-New-Testament period to the medieval period and the early Renaissance. Principal themes include the emergence and meaning of early Christian beliefs and practices, their development during the Middle Ages, the social and cultural environments of the ancient, medieval, and early Renaissance church, and the trends leading up to the Reformation. This course is offered in the fall semester.

REL-181-01, *Religion in America*

An introduction to the religious history of America, this course will explore the historical development of the primary religious traditions in America, especially Protestantism, Catholicism, and Judaism, as well as the formative influence of religion among women, African Americans, and American Indians. Principal themes include pluralism, the impact of religious disestablishment, revivalism and reform, theological movements, and religious innovation. This course is offered in the fall semester.

REL-208-01/SOC-208-01, *Healing: Religion & Sociology*

This course is designed to help students understand the sociological and religious dimensions to what counts as "healing." Are humans primarily like machines whose broken parts can be fixed? Could healing be present even if a sickness or its symptoms continue to be present? In what ways do social arrangements like stratification, power distribution and status affect health outcomes? While especially helpful for students considering careers in healthcare, the class is focused on "living humanely" by deepening your appreciation of the complexities behind the harms that come to human bodies and minds and the multiple ways the effects of those harms can be healed. The course is organized to meet expected learning standards for the Sociology portion of MCAT.

REL-280-01, *Contemporary American Religion*

This discussion course examines the nature and contours of religion in the U.S. today and in recent decades. The American religious atmosphere is undergoing significant changes, from the diminishment of denominationalism and associated religious identities, to individualized bespoke spirituality and the substantial recent growth of "nones" (people with no declared religious affiliation). We will situate such changes historically, but our main focus will be analyzing the current landscape and its meaning for collective and individual religiosity, as well as for American culture and society generally. We will cover a diverse range of religious expressions, from more traditional to newer forms of religiosity.

REL-290-02/CLA-111-02, *Afterlife*

2nd Half Semester Course.

Conceptions of the afterlife frequently govern our 'now'-life, providing it with meaning and an overarching logic. Yet, we rarely pause to consider where our ideas about the afterlife come from, not to mention the historical events, social histories, and philosophies that gave rise to views of the afterlife now held to be obvious and timeless. There was a time 'before' heaven above, resurrection of the body, the immortality of the soul, and even angels. How do conceptions of the afterlife emerge, and what is the range of those conceptions in the Jewish, Roman, and Christian

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

traditions? Moreover, how do these traditions mutually inform one another? This course will detail ancient ideas about the afterlife in a wide array of textual and archeological tradition in conversation with our contemporary world. Will our technology change our afterlife?

RHETORIC

RHE-101, *Public Speaking*

This course covers the fundamentals of rhetoric composition and delivery. Students research, compose, and deliver informative and persuasive speeches, and they lead a small group of their peers in a deliberative discussion. In addition, students learn and employ introductory principles of reasoning, argumentation, and rhetorical criticism. Finally, they analyze the videotape recordings of their speeches and learn to use electronic media in public presentations.

SPANISH

SPA-101 and 101L, *Elementary Spanish I*

Must register for both lecture and lab. Requires SPA-101 placement OR placement at any level in a different language.

The student with little or no previous training in Spanish will become grounded in the language and gain some understanding of Hispanic cultures. Upon successful completion of the course students will understand and respond in common conversational situations, read straightforward prose, and write simple but correct Spanish. This course is offered in the fall semester. Successful completion of both SPA-101 and SPA-102 satisfies the World Languages distribution requirement.

SPA-103 and 103L, *Accelerated Elementary Spanish*

Must register for both lecture and lab. Requires SPA-103 placement.

This is an accelerated Introduction to Spanish course that reviews the basic grammar elements and vocabulary for students with a limited background in high school Spanish. The course covers in one semester the material presented in SPA-101 and SPA-102. Successful completion of the course satisfies the Wabash language requirement and prepares students to move on to SPA-201.

SPA-201 and 201L, *Intermediate Spanish*

Must register for both lecture and lab. Requires SPA-201 placement.

This course provides a thorough review of the fundamentals of the language. Students will continue their growth via active use of the language in order to develop communication skills: speaking, listening, writing, and cultural awareness. Students will also read Spanish texts that reinforce the study of the language and knowledge of Hispanic cultures. Particular attention will be given to improving self-expression in Spanish beyond the rudimentary level.

SPA-202 and 202L, *Spanish Language & Hispanic Cultures*

Must register for both lecture and lab. Requires SPA-202 placement.

This course focuses on the active use of Spanish. Its goals are to develop the student's command of Spanish through guided practice in the use of the language and to increase his understanding of Hispanic cultures as reflected in the language and life in the Spanish-speaking world.

SPA-301, *Conversation & Composition*

Requires SPA-301 placement.

This course focuses on the continued development of the student's command of the Spanish language and his understanding of the cultures of the Spanish-speaking world, with an emphasis on speaking and writing. Students gain competence in writing and speaking and read selections of both Spanish and Spanish American fiction and nonfiction.

THEATER

THE-101-01, *Introduction to Theater*

This course explores many aspects of the theater: the audience, the actor, the visual elements, the role of the director, theater history, and selected dramatic literature. The goal is to heighten the student's appreciation and understanding

RECOMMENDED FALL 2024 COURSES FOR BEGINNING STUDENTS

COURSE DESCRIPTIONS

of the art of the theater. The plays we will encounter will range from the Greek tragedies of 2,500 years ago to new works by contemporary playwrights: from Sophocles' *Antigone* to Lin-Manuel Miranda's *Hamilton*. Students will see and write reviews of theater productions, both on- and off-campus. This course is appropriate for all students, at all levels.

THE-103-01, *Escape Rooms*

Interested in creating your own unique performance piece? Want to build an interactive game to baffle your friends? In this course, students will learn and practice theater devising methods such as Moment Work and Viewpoints to build a performance of their own creation. Students will also work together to create an immersive, theater-themed Escape Room using ideas from gaming and devising to construct and solve their own mysteries.

THE-104-01, *Introduction to Film*

This course is intended to introduce students to film as an international art form and provide an historical survey of world cinema from its inception to the present. The course will focus on key films, filmmakers, and movements that have played a major role in pioneering and shaping film. Selected motion pictures will be screened, studied, and discussed, with special emphasis placed on learning how to "read" a film in terms of its narrative structure, genre, and visual style. Specific filmic techniques such as mise en scene, montage, and cinematography will also be considered. Genre study, auteurism, and ideology will be explored in relation to specific films and filmmakers, as well as the practice of adaptation (from theater to film, and most recently, film to theater).

THE-105-01, *Introduction to Acting*

This course introduces students to the fundamentals of acting through physical and vocal exercises, improvisation, preparation of scenes, and text and character analysis. Students will prepare scenes for classroom and public presentation. Students will also collaborate with the directing class in producing an evening of original one-act plays for the community. This course is appropriate for all students, regardless of artistic background.

THE-203-01, *Costume Design*

This course is an in-depth look at the process of costume design from start to finish. Through a series of design projects, students will explore the relation of costuming to theater history and performance, and the culture at large. Combining historical research, character and script analysis, collaborative projects, and the intensive study of the elements and principles of design, color theory and rendering, students will gain a comprehensive understanding of the costume designer's creative practice.

THE-217-01/ENG-310-01, *The American Stage*

This course will examine the rich dramatic heritage of the United States from the American Revolution to the present, with emphasis on the history of the U.S. stage and the work of major dramatists including Eugene O'Neill, Thornton Wilder, Tennessee Williams, Arthur Miller, and Edward Albee, among others. Plays to be studied include *The Contrast*, *Secret Service*, *Uncle Tom's Cabin*, *Long Day's Journey Into Night*, *A Moon for the Misbegotten*, *Awake and Sing!*, *The Little Foxes*, *Our Town*, *The Skin of Our Teeth*, *Mister Roberts*, *A Streetcar Named Desire*, *The Night of the Iguana*, *Death of a Salesman*, *The Crucible*, *A Raisin in the Sun*, *The Zoo Story*, *Who's Afraid of Virginia Woolf?*, *Glengarry Glen Ross*, *True West*, *Brighton Beach Memoirs*, *The Colored Museum*, *A Perfect Ganesh*, *Fences*, *Angels in America*, *How I Learned to Drive*, and *The America Play*. The plays will be discussed as instruments for theatrical production; as examples of dramatic style, structure, and genre; and, most importantly, as they reflect moral, social, and political issues throughout the history of the United States. Students taking this course for credit toward the English major or minor must have taken at least one previous course in English or American literature. No more than one course taken outside the English Department will be counted toward the major or minor in English.
